## EDUCATION

### SRM University

Bachelor of Technology in Computer Science (CGPA: **9.24/10**)

Chennai, TN

Aug 2023 – May 2027

### IIT Madras

Bachelor of Science in Data Science, Foundation Level

Aug 2024 – Present

## EXPERIENCE

### GPT Intern (Data Analytics)

Jul 2026 – Present

ADP India

Hyderabad

- Contributing to enterprise **Data Migration** projects, migrating data from **Microsoft SQL Server** to **Databricks Lakebase** using the Databricks platform.
- Developing and optimizing **ETL/ELT Pipelines** for data extraction, transformation, loading, and integration across source and target systems.
- Leveraging **Databricks**, **SSMS**, and **SQL** to extract, transform, validate, reconcile, and optimize large-scale datasets.
- Performing **Source-to-Target Data Validation and Reconciliation** to ensure data accuracy, completeness, consistency, and integrity throughout migration workflows.
- Analyzing existing **SQL Server** data structures, queries, and business requirements to design scalable and migration-ready data solutions.
- Identifying and resolving **Data Quality Issues**, transformation discrepancies, and migration defects across ETL and validation stages.
- Optimizing **SQL Queries** and data-processing workflows to improve pipeline performance, processing efficiency, and overall reliability.
- Performing **Data Analysis** to validate migrated datasets, identify trends and anomalies, and support business intelligence and reporting requirements.
- Collaborating within an **Agile Development Team** through code reviews, technical discussions, knowledge-sharing sessions, and continuous improvement initiatives.

### Automation and App Development Intern

Jun 2025 – Sep 2025

XORSTACK

Bengaluru

- Built an automated content generation system using **n8n**, which scrapes trending data, leverages AI to generate original post content, and publishes automatically for specific users.
- Developed a mobile puzzle game using **Flutter** and **SQLite**, implementing core game logic, UI/UX, and local data storage.
- Integrated **AI-powered content analysis** pipelines to personalize posts and optimize user engagement.
- Gained hands-on experience in workflow automation, mobile application development, and database management.

## TECHNICAL SKILLS

- Programming Languages:** Java, C++, Python, C, JavaScript, SQL
- Web & Mobile Development:** Flutter, HTML, CSS, React
- Databases:** PostgreSQL, MySQL, SQLite, Firebase, Supabase
- Data Analytics & Machine Learning:** Pandas, NumPy, Scikit-learn, TensorFlow, Matplotlib, Seaborn, NLP, Deep Learning, Generative AI, LLMs
- Tools & Platforms:** Git, GitHub, VS Code, Jupyter Notebook, n8n, Databricks, SQL Server Management Studio
- CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Programming, DBMS, Computer Networks, Operating Systems
- Other:** Problem Solving, Agile Methodologies, AWS Cloud Fundamentals

## PROJECTS

---

### AI Fitness Trainer | *Python, OpenCV, YOLOv8, Deep Learning*

Jan 2025 – Present

- Built an **AI-powered fitness trainer** capable of detecting and counting exercises in real-time using webcam input.
- Trained a **YOLOv8 model** on a custom push-up dataset to accurately detect posture and count repetitions.
- Implemented **bicep curl detection** using keypoints and angle-based analysis for real-time form evaluation.
- Integrated **OpenCV pipelines** for live feedback on exercise quality and performance.
- Currently expanding the system to support additional exercises with new datasets and model training.

### AROGION – Healthcare Appointment System

May 2025 – Present

- **Technologies:** Flutter, PostgreSQL, Firebase Authentication, Supabase, Google Maps API, Agora
- Developed a **healthcare platform** for appointment booking, digital prescriptions, and medical record management.
- Implemented **secure role-based authentication** for Patients, Doctors, and Administrators using Firebase Authentication.
- Designed and optimized **PostgreSQL databases** for efficient healthcare data management and retrieval.
- Integrated **Google Maps API** for hospital discovery, location tracking, and navigation support.
- Built **real-time appointment scheduling** with availability tracking, reminders, and notification services.
- Integrated **Agora Video Calling** for virtual doctor-patient consultations within the application.
- Developed a **scalable and modular architecture** supporting future healthcare service expansions.

## CERTIFICATIONS

---

- **AWS:** Certified AI Practitioner
- **Salesforce:** Agentforce Specialist Certificate
- **Algo University:** Graphs Camp Completion
- **NPTEL:** Introduction to Machine Learning
- **Cisco:** Introduction to IoT and Digital Transformations, Networking Basics
- **Skillsoft:** Principles of IoT and Python Basics

## ACHIEVEMENTS

---

### Deloitte Hacksplosion 2026

*Top 60 Teams Nationwide*

- Selected among the **Top 60 teams out of 21,000+ participants** across India.
- Built an **Agentic AI-based solution** on Deloitte's **GenW.AI platform** to address **tax and legal compliance challenges** faced by organizations.
- Developed **intelligent AI agents** capable of analyzing regulations, assisting with compliance workflows, and providing contextual recommendations.
- Integrated **Large Language Models (LLMs)** to generate summarized compliance reports, explain regulatory requirements, and provide user-friendly insights.
- Advanced through **multiple evaluation rounds** and reached the **pre-final stage** of the national hackathon.

### Product Expo 2026 – SRM AMIEE

*3rd Place – Special Mention and Cash Prize*

- Received recognition for developing an **AI-based tomato crop weed and disease detection system**.
- Proposed integration of the model with **drone-based precision agriculture**, optimizing flight routes, battery usage, and enabling efficient large-scale crop monitoring.
